**Purpose** Lead team identifying potential security information risks and providing governance, consultancy on how to manage and mitigate against those risks.

### Key Accountabilities

- Recruit, direct, engage, performance manage, coach and develop a team of Security Information Risk Advisors to drive high performance
- Working on cross-business processes and large programmes of work within the FCDO Services and for its Customers: identify potential security information risks associated with the acquisition, implementation or use of technologies, including software, hardware, access points and user processes. Recommend controls, audit requirements and tests to monitor and mitigate risks.
- Analyse identified security breaches and recommend solutions to mitigate against similar incidents occurring in the future
- Provide governance, consultancy and business-driven advice on the management of security information risk and promote security awareness across the organisation
- Input to the development of security policies, risk assessment and architecture for FCDO Services and its customers
- Coach associates and share knowledge with team colleagues
- Maintain own professional development and expertise in the latest technologies and best practice to support and grow the business and team

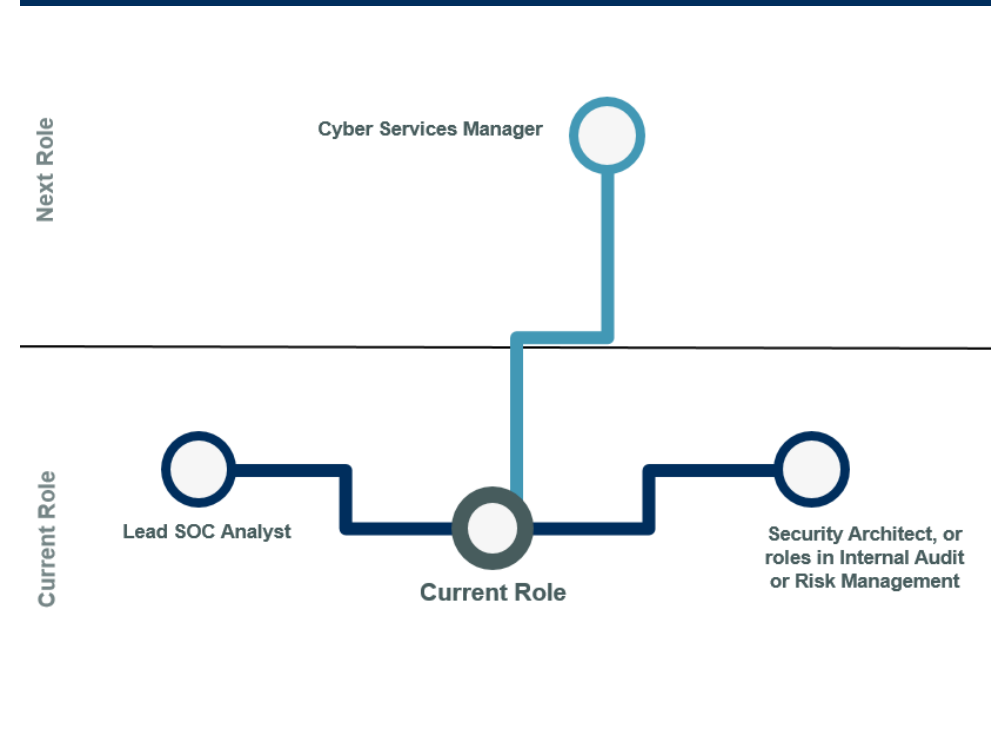

### Authority and Scope

- Monitor team’s activities ensuring all work delivered in agreed timeframes and in compliance with all relevant policies and processes
- Escalate identified risks and security breaches that are beyond agreed tolerances
- Responsible for performance and development of 1 Senior SIRA and 1 Practitioner SIRA ensuring all comply with policies and processes

### Internal and External Communications

- Customers, directors and senior internal contacts to explain potential security risks and advise on mitigation of risks
- Analysts, application developers and testers to provide advice on security information risks
- Security Architects to advise how to build robustness into technical solutions
- Wider security team to analyse issues, and understand how different types of attack might manifest in the network

### Potential Next Career Moves

### Skills

- Stakeholder management
- Lead in a matrix structure
- Bridge technical and non-technical
- Applied security capability
- Information Risk Assessment and Risk Management
- Risk understanding and mitigation
- Protective security
- Security architecture
- Threat understanding

### Qualifications, Knowledge and Experience

- Essential**
- IS related qualifications, e.g. CISO Certified Professional; ISO 207001 Internal Auditor or Lead Implementer
  - Extensive knowledge of technical and security tools and techniques
  - Experience analysing proposals, processes and practices and identifying security information risks
  - Line management experience
  - Strong influencing and interpersonal skills
  - Able to produce clear technical documentation

- Desirable**
-
